# EAGLE MODEL 1310

## Millenium Line Sentinel™

---

**AUTO-SWITCH CUT PHONE LINES! ALLOWS A  
PANEL TO OPERATE OVER AND SUPERVISE  
TWO SEPARATE PHONE LINES!**

Eagle Model 1310 Millenium Line Sentinel™ is a dual telephone line monitor and switcher which allows a panel to operate over and supervise two separate phone lines. The Eagle Model 1310 utilizes the same time proven phone line monitoring circuitry as the Eagle Model 1300 Telephone Line Fault Monitor but in addition, **monitors two lines** and **auto-switches** the security system to a **secure line** in the event a line is cut or disrupted. The control panel is **automatically** connected to a **back-up phone line** whenever a line fault is detected on the primary line. The Model 1310 Millenium Line Sentinel™ monitors both lines ensuring the system is **always connected** to an intact phone line.

**Auto-resetting, dual relay alarm output** for line cut condition provides universal panel connection and independent dual line monitoring. **Dual LED indicators** provide individual line status (including alarm memory and active line fault) for both lines at all times. Pushbutton reset for LED alarm memory.

### APPLICATIONS

- ◆ Homes and apartments
- ◆ Businesses
- ◆ Strip plazas and malls
- ◆ Office buildings and medical centers
- ◆ ANYWHERE there is more than one phone line!

**NEW!**

### FEATURES

- ◆ Dual line fault detection plus alarm
- ◆ Dual alarm relay outputs w/ auto-reset
- ◆ Dual status LEDs
- ◆ Low current draw in standby
- ◆ Alarm memory reset
- ◆ Secondary line detect bypass for cellular use
- ◆ Five second line switch delay
- ◆ Thirty second alarm trip delay

### SPECIFICATIONS

Dimensions: 4.00" x 5.00" x 1"

Power; Voltage: 12VDC

Current (Standby/Active): TBD mA/ TBD mA

### ORDERING INFORMATION

P/N: 301310 Model 1310 Millenium Line Sentinel™

### WARRANTY

All EAGLE Security Products, Inc. Products are backed by our standard "out-of-the-box" failure warranty: If it's bad, we'll replace it. Contact EAGLE for details.

All specifications preliminary and subject to change without notice.

## MORE QUALITY EAGLE PRODUCTS

	<p><b>Model 1500 Programmable Relay Timer.</b> The EAGLE Model 1500 Programmable Relay Timer offers all the traditional timer functions plus unique features that add enormous versatility to the unit. The unit features two inter-dependent inputs, a 10-amp relay output (SPDT), an open collector transistor output offering an infinite array of timer application possibilities. An on-board LED indicates when the relay is active. AC or DC operation allows the timer to stand alone or work with an alarm panel. It's slim, 1½ inch width, allows the unit to fit into most door jams. Programming is simple, utilizing a standard touch tone phone or serviceman's test set.</p>
	<p><b>Model 1260 Terminator™ Advantage Two Way Audio Module.</b> The EAGLE FALSE ALARM TERMINATOR ADVANTAGE™ provides up to <b>48 individual zones of microphones, speakers and relays.</b> A system capable of approx. <b>200 microphones and speakers!</b> More zones (mic's, speakers &amp; relays, too) than any other add-on two way voice system available. Each zone is individually or zone follower addressable for maximum flexibility and performance. It is the dealer's choice for <b>commercial installations.</b> (Shown with Model 1261.)</p> <p><b>NEW!</b> Custom order your Model 1260 with the capacity of up to 96 zones (nearly 400 microphones and speakers!)</p>
<p style="text-align: center;">Picture coming Soon!</p>	<p style="text-align: center;"><b>NEW!</b></p> <p><b>Model 1501 Programmable Temperature Sensor.</b> The EAGLE Model 1501 Programmable Temperature Sensor offers programmable high and low temperature sensing at a very low cost. The Model 1501 arrives pre-programmed, but custom programming is simple utilizing its programmer. The Model 1501 is ideal for homes, cottages, offices, animal shelters or any remote location where the temperature minimum and/or maximum must be monitored. The Model 1501 is a great sales closer, too! It's low cost and ease of installation make it the perfect closing tool! Four wires &amp; no programming minimize installation costs.</p>
	<p><b>Model 1302 Rex, The Buddy System.</b> Rex, The Buddy System utilizes the same time proven phone line monitoring circuitry as the Eagle Model 1300 Telephone Line Fault Monitor while providing an intelligent output to activate an RF short range transmitter (which have ranges up to a mile) whenever a line fault is detected <b>AND</b> the burglar system has detected an alarm. Once activated, a RF transmitter (available separately) will send a signal to a neighboring home or business where you have installed a matching RF Receiver and digital communicator (or perhaps they already have an alarm system with a communicator.) This equipment will then dial out utilizing the neighbors secure phone line and report the Line Fault + Alarm condition. Rex, The Buddy System, does not initiate communications without both a line fault <b>AND</b> an alarm condition. You can now offer your customers back up communications and get a foot in the door, next door! Ideal for residential as well as commercial applications.</p>
<p style="text-align: center;">Picture coming Soon!</p>	<p><b>Model 1910 Millenium Door Intercom.</b> The EAGLE Model 1910 Millenium Door Intercom allows the any phone in the premises which is connected through the system to have a two way conversation with a person at a door where the external station is located. When the doorbell button is pressed, the phones will ring with a pre-programmed pattern alerting the premises that somebody is at the door. Alternatively, a traditional door bell chime may be used without the door ringer. If a phone is in use when the doorbell is pressed, a tone is generated alerting the user that the doorbell is pressed. If desired, the user may unlock the door with the door strike activation relay (door strike not included.)</p>
