

EAGLE Model 2102P

REMOTE MICROPHONE
WITH OR WITHOUT MOUNTING PLATE

ADD REMOTE MICROPHONES ANYWHERE YOU NEED!

Now you can add remote microphones anywhere you need to increase listening coverage. Eagle 2102P Remote Microphone offers flexible mounting in your enclosure. Eagle Model 2102P combines the same great remote microphone with a stylish white single-gang mounting plate. This new sleek styling provides dealers with a more attractive look than previously available.

The new Eagle 2102P Remote Microphone features a new two wire power amplified design for use with all Terminator series two way audio modules for all your two way voice and listen-in applications.

The Model 2102P Remote Microphone features two wire connections with standard cabling. Shielded cabling not required on runs less than 100 feet.

The latest revision of the 2102P Remote Microphone features a quick connect terminal block for maximum versatility!

Also available is the Model 2172W-CC. This is a conformal-coated version for exterior or high humidity applications. The 2172W-CC features a microphone on a pigtail for remote mounting of the circuit board. The 2172W-CC does not feature the terminal block connections.

New to the product line is Model 2172A In-Line Amplifier. This unit provides the interfacing and gain needed for line-level output devices including sound detectors which feature an audio output. Now you can use self-contained sound detectors and Eagle Two-Way Audio in large consultant spec'd systems like schools, municipal buildings, etc.
