# EAGLE Model 2150 & 2151

SPEAKER & SPEAKER w/ MICROPHONE  
SURFACE & SEMI-FLUSH MOUNT

---

**THE FIRST SPEAKER TO PROVIDE BOTH THE CONVENIENCE OF SURFACE MOUNTING AND THE ESTHETICS OF SEMI-FLUSH MOUNTING.**

Many manufacturers offer speakers with surface mounting or semi-flush mounting. The new Eagle 2150 Speaker and the new Eagle 2151 Speaker/Microphone offer both mounting preferences built into one package! New sleek styling provides dealers with a more attractive look than previously available.

The new Eagle 2150 Speaker has provisions for microphone mounting for use in listen-in and two way audio applications. Additionally, both the Model 2150 and 2151 provide a recessed location for private labeling for organizations desiring a custom and proprietary look.

The Model 2150 and 2151 are shaped like and are similar in size to many popular keypads offered today providing system uniformity. Additionally, the units come in off white for maximum versatility.

The Model 2151 provides all the features of the Model 2150 PLUS featuring a highly sensitive three wire electret microphone for use in listen-in and two way voice applications. (Note: the Model 2151 is not recommended for use in VOX applications. Use with Model 1221 Two Way Voice Module ONLY!)
